

INNOVATION THROUGH SIMULATION

Math2Market GmbH is one of the leading companies in the fields of digital material development and digital rock physics. With our versatile GeoDict® software, we offer solutions for digitization that are used in key industry segments worldwide. Our customers are R&D departments of renowned and international corporations, high-ranking research institutions, and outstanding universities.

As a dynamic and quickly growing, owner-run company with currently approx. 40 employees, we offer attractive career development opportunities and potential for growth in Kaiserslautern. We offer flexible working conditions in terms of tasks and responsibilities in line with your expertise, skills, and interests.

We are looking for:

Application Engineer (m/f/d)

As an application engineer in our Consulting & Projects team, you will work on innovative development and consulting projects, in close cooperation with our clients. Be it a new air filter, a more powerful battery, a lighter car body or analysis of rock samples: with input from our clients, you identify the optimal digital solution and drive forward future projects in digital material development and analysis.

Your tasks:

- Plan and carry out projects for international customers
- Build productive client relationships and act as internal agent for client feedback
- Visit our clients worldwide and present the project results
- Provide high-level technical support as well as plan and execute user trainings
- Write case studies, whitepapers, project documentation, and software handbooks

What we seek in our employees is that they

- like working in an IT-dominated environment
- are willing and motivated to keep on learning and enjoy getting to know new material.
- work reliably and independently

- focus on goals and solutions without losing sight of the overall picture.
- have strong analytical skills and attention to detail
- act in a cooperative and service-oriented manner
- think for themselves and are team players
- are hard-working and enjoy traveling
- are interculturally competent

Your profile

- Academic education in a STEM* discipline
- Experience with complex simulation software in the scientific field
- Ideally, experience in one of our business areas, <https://www.math2market.de/Solutions/aboutGD.php>
- Enjoy contact with customers
- Proficient in written and spoken English

Are you interested? Then, send your detailed application documents to:
